

BRITISH ACADEMY
ANNUAL REPORT

1962-3

1. DEATHS AND ELECTIONS OF FELLOWS.—The Academy has lost nine Ordinary Fellows by death during the year: Lord Beveridge, Dr. W. H. S. Jones, Sir James Mann, Dr. A. Lane Poole, Sir Maurice Powicke, Sir Dennis Robertson, Mr. Leon Roth, Dr. G. M. Trevelyan, and Professor F. P. Wilson.

The deaths of the following Corresponding Fellows were also reported: Professor A. D. Nock and Professor George Sherburn.

In July 1962 the following were elected to Ordinary Fellowship: Dr. R. D. Barnett, the Reverend Professor W. O. Chadwick, Dr. I. E. S. Edwards, Professor H. L. A. Hart, Dr. Otto Kurz, Miss M. M. Lascelles, Mr. J. P. Plamenatz, and Professor G. O. Sayles.

At the same meeting the following were elected to Corresponding Fellowship: Professor Fernand Braudel, Professor Dr. Josef Keil, the Reverend Professor André Parrot, and Professor H. C. Youtie.

President (Sir) Sarvepalli Radhakrishnan, F.B.A., President of the Republic of India, was made an Honorary Fellow.

The total number of Fellows before the election in July 1963 was 230 Ordinary Fellows (including 42 Senior Fellows and 2 Fellows elected under Supplemental Charter), 71 Corresponding Fellows, and 4 Honorary Fellows.

2. OFFICERS.—Lord Robbins was elected President, Professor R. G. D. Allen Treasurer, and Sir Mortimer Wheeler Secretary. On the nomination of the President, the Council appointed Dr. A. L. Goodhart and Professor I. A. Richmond as Vice-Presidents.

3. LECTURES.—The following lectures were delivered:

MACCABAEAN LECTURE, by Dean Erwin N. Griswold, on *Two Branches of the same Stream* (18 October 1962).

WARTON LECTURE, by Professor J. F. Kermodé, on *Spenser and the Allegorists* (7 November 1962).

DAWES HICKS LECTURE, by Professor A. N. Prior, on *Some Problems of Self-Reference in John Buridan* (21 November 1962).

MASTER-MIND LECTURE, by Professor H. L. A. Hart, on *Bentham* (5 December 1962).

CHATTERTON LECTURE, by Mr. Laurence Lerner, on *W. B. Yeats* (16 January 1963).

RALEIGH LECTURE, by Mr. E. H. Carr, on *The Russian Revolution and the Peasant* (30 January 1963).

WARTON LECTURE, by Professor Kathleen Coburn, on *Coleridge on the Interpenetration of Man and Nature* (13 February 1963).

PHILOSOPHICAL LECTURE, by Mr. R. M. Hare, on *Descriptivism* (20 March 1963).

SHAKESPEARE LECTURE, by Professor Harold Jenkins, on *Hamlet and Ophelia* (3 April 1963).

RECKITT ARCHAEOLOGICAL LECTURE, by Professor Seton H. F. Lloyd, on *The Bronze Age Architecture of Anatolia* (1 May 1963).

Dr. G. Zuntz, on *The Interpretation of the Dionysiac Fresco in the Villa dei Misteri at Pompeii* (19 June 1963).

4. PUBLICATIONS.—During the year the Academy has published its *Proceedings*, Vol. xlviii (1962), and *Chârsada* by Sir Mortimer Wheeler.

The following works in which the Academy has an interest have also been published: *Sylloge Nummorum Graecorum, The Burton Y. Berry Collection, Part II, Megaris to Egypt* (American Numismatic Society); *Repertorium Fontium Historiae Medii Aevi, I, Series Collectionum*; *Monumenta Asiae Minoris Antiqua, Vol. viii, Monuments from Lycaonia, the Pisido-Phrygian Borderland, Aphrodisias*, edited by Sir William Calder and J. M. R. Cormack; *The Place-Names of the West Riding of Yorkshire, Pts. vii and viii*, by A. H. Smith (English Place-Name Society, Vols. xxxvi and xxxvii); *The Registers of the Parish Church of Dalton-in-Furness, Pt. 1, 1565-1620*, edited by Robert Dickinson (Lancashire Parish Register Society, Vol. 100); *The Laurels and the Tiara, Pope Pius II, 1458-64*, by R. J. Mitchell; *Sylloge of Coins of the British Isles, Vol. 3—The Coins of the Coritani*, by D. F. Allen; *Early English Church Music, Vol. i—Early Tudor Masses: I*, transcribed and edited by John D. Bergsagel; Pipe Roll Society, New Series, Vol. 36—*A Medieval Miscellany for Doris Mary Stenton*; *The Abinnaeus Archive: Papers of a Roman Officer in the Reign of Constantius II*, collected and re-edited by H. I. Bell, V. Martin, E. G. Turner, and D. van Berchem; *Guillelmi de Ockham Opera Politica, Vol. ii*, edited by H. S. Offler (Manchester University Press).

5. AWARDS.—The following Prizes and Medals were awarded:

Serena Medal, 1963: Professor Johannes Wilde.

Burkitt Medal, 1963: Professor Walther Eichrodt.

Kenyon Medal, 1963: Professor C. W. Blegen.

Rose Mary Crawshay Prize, 1963: Mrs. Joan Bennett.

Cromer Greek Prize, 1963: Professor George Huxley for his essay on *Achaean and Hittites*. A special prize was also awarded to Mr. J. T. Hooker for his essay on *The Greeks and Knossos in the Fifteenth Century B.C.*

Sir Israel Gollancz Prize, 1963: Professor George Kane.

6. ANNUAL DINNER.—The Eighth Annual Dinner of the Academy was held, by kind permission of the Vice-Chancellor of the University of London, at the Senate House on Tuesday, 26 March 1963. Eighty-six Fellows were present and the Principal Guest was H.M. Queen

Elizabeth The Queen Mother. Other guests included the Ambassador of the United Arab Republic, Sir Ralph Anstruther, Bt., Mr. William Armstrong, Dame Peggy Ashcroft, Mr. John Boyd-Carpenter, M.P., Lord Cottesloe, Mr. Ian Cox, Mr. P. A. Daniell, the Earl of Drogheda, Mr. L. Farrer-Brown, Mr. R. C. Griffiths, Sir Ronald Harris, Sir Laurence Helsby, Sir Philip Hendy, Lord Kilmaine, Sir Frank Lee, Sir Douglas Logan, the Hon. Roger Nathan, Dr. P. S. Noble, Dr. Walter Oakeshott, Lord Pearce, Lieut.-General Sir Harold Redman, the Countess Spencer, Mr. J. C. Thornton, Sir Burke Trend, and Sir Richard Turnbull. H.M. The Queen Mother proposed the toast of the Academy, Dr. A. L. Goodhart that of the Guests. Sir Frank Lee replied for the Guests and the President for the Academy.

7. REPRESENTATION.—The following were appointed to represent the Academy:

Professor R. G. D. Allen at the 34th Session of the International Statistical Institute in Ottawa, 21-29 August 1963.

Sir Roger Mynors and Mr. C. H. Roberts at the Union Académique Internationale Meeting in Vienna, June 1963.

Sir Mortimer Wheeler at the Tercentenary of the Académie des Inscriptions et Belles-Lettres, Paris, 7-9 June 1963.

Sir Mortimer Wheeler and Professor I. A. Richmond on the Standing Advisory Committee on the Recording of Ancient Monuments and Historic Buildings, set up by H.M. Treasury.

8. GRANTS-IN-AID

(a) The Treasury grant for 1963-4 was allocated by the Council of the Academy as follows:

	£
British School of Archaeology at Athens	12,000
British School at Rome	12,000
British School at Rome, non-recurring grant towards the cost of urgent structural repairs to the building in Rome	750
British Institute of Archaeology at Ankara	10,000
British Institute of History and Archaeology in East Africa	10,000
British Institute of Persian Studies	10,000
British School of Archaeology in Jerusalem	6,500
British School of Archaeology in Iraq	6,500
Egypt Exploration Society	6,000
Egypt Exploration Society for archaeological salvage work in Nubia	10,000
Council for British Archaeology	5,000
Council for British Archaeology, non-recurring grant towards the costs in connexion with change of premises under direction from H.M. Ministry of Works	250
The British Academy, for general purposes	11,000
The British Academy, for research	25,000
	<u>£125,000</u>

(b) The following grants-in-aid were made from the funds of the Academy:

	£
Sylloge of British Coins	500
Catalogus Baronum (Miss E. M. Jamison)	100
Anglo-Norman Text Society	75
Canterbury and York Society	200
British National Committee of the International Historical Congress	50
English Place-Name Society	200
Pipe Roll Society	175
Navy Records Society	200
Medieval Latin Dictionary Committee	100
Lincoln Record Society	100
Oxfordshire Record Society	160
Yorkshire Archaeological Society (Records)	150
Talbot and Shrewsbury Papers	100
Lancashire Parish Register Society	70
Royal Asiatic Society	200
Encyclopaedia of Islam	200
Greek Literary Papyri (E. Lobel)	200
History of Classical Scholarship (R. Pfeiffer)	75
Thesaurus Linguae Latinae	75
Corpus Platonicum	100
Aristoteles Latinus	50
International Association of Classical Archaeology	25
Critical edition of Ibsen's dramatic works (J. W. McFarlane)	121
Modern Greek/English Dictionary (J. T. Pring)	70
International Federation of Philosophical Societies	25
	£3,321

9. RESEARCH GRANTS

(i) GENERAL RESEARCH FUND.—Following upon the presentation of the survey on *Research in the Humanities and the Social Sciences* (1961), carried out by the British Academy with the aid of the Rockefeller Foundation, H.M. Government has placed an initial grant of £25,000 at the disposal of the Academy for the subvention of research in the Humanities. The Social Sciences are omitted from the scope of this grant, pending a wider consideration of the needs of these sciences in the varying contexts in which they operate.

This new Research Grant has been allocated for the first time for the financial year 1963-4 by the Council of the Academy upon the advice of a Research Fund Committee, which has in turn consulted the appropriate Sections. The Committee consists of the President (Lord Robbins), the Secretary (Sir Mortimer Wheeler), Sir Maurice Bowra, Sir Goronwy Edwards, Sir Frank Francis, Sir Ivor Jennings, Miss Kathleen M. Kenyon, and Professor I. A. Richmond.

The published terms under which allocations are made from this Fund are as follows:

1. The allocation will be made annually in May, and applications must be received by the Secretary, The British Academy, Burlington Gardens, London, W.1, not later than the 1st February of each year, beginning in 1963.
2. Grants are initially for one year only, but may be renewed for a second year, to the same or a varying amount, on consideration of a further application accompanied by a report. Only in exceptional circumstances will a third application be considered.
3. Applications must normally be made in the name of an individual, not of an institution. But a project involving team-work will fall within the scope of the Fund, provided that the leader of the team assumes full responsibility for his colleagues and submits their names and qualifications to the Academy.
4. Applicants must furnish details of their schemes of research, including proposals for publication, together with the names of not less than two nor more than three referees.
5. Applications must be accompanied by a full statement of
 - (a) the total sum required for the project,
 - (b) funds already available from other sources,
 - (c) applications already made elsewhere, and the results where known.

It is particularly important that applicants in the employment of institutions (notably universities, national museums and libraries) which are already in receipt of State funds shall explore all institutional resources before applying to the Academy, and shall clearly specify the action taken.

6. Applicants must undertake to furnish the Academy with a summary report within six months of the conclusion of the period for which an award has been made.
7. Within these general conditions, the Academy has no desire to impose restriction. The following are examples of headings under which application might properly be made:
 - i. *Study leave*, whether for university and school teachers or members of some other profession (such as library or museum staffs), in the form of travel-grants for work in the U.K. or abroad and for maintaining contact with foreign scholars, discoveries, and materials in connexion with an approved programme of research.
 - ii. *Vacation work* involving travel or other incidental costs in connexion with approved research.
 - iii. *Attendance at, and contribution to, learned congresses and conferences abroad.*

- iv. *Invited visits to the U.K. by foreign scholars of distinction for the purposes of furthering research*, in so far as these are not sponsored by the British Council or other Government-aided body.
 - v. *Aid to the publication of research* where adequate provision is lacking, whether in periodical or other form.
 - vi. *Aids for specific purposes to specialist libraries*, such as those maintained by certain learned societies.
 - vii. *Aid to fieldwork* in linguistic, musical, historical, archaeological or anthropological studies.
 - viii. *The provision of mechanical aids* such as microfilms and recording-instruments.
8. Whenever applicable, full and prompt publication will be an overriding condition of the award of a research-grant. This condition normally implies publication within two years of the completion of the period for which the grant is made.

Since the provision of a Research Fund by H.M. Government specifically for the Humanities represents a new departure in the subvention of academic research, notes are added as to the operation of the scheme in its first year. The provision was made widely known to universities, museums, and libraries and to individual scholars, and the response was appreciable. Excluding submissions which fell clearly below standard, 82 qualified applicants submitted viable research-schemes involving grants amounting in the aggregate to £89,666. On review, 44 of these schemes were accepted by the Council of the Academy and are listed below. The remaining 38 schemes were either rejected or deferred; but the Council would place it on record that the average standard was high, and that the acceptance of more than half of the applications is a gratifying indication of the potential value of the new Fund as an aid and stimulus to humanistic studies. It would have been easy to dispense a considerably larger sum than was in fact available during this exploratory phase.

The wide range of the applications was also an encouraging feature. In matter they extended from Anglo-Norman, Scottish, and Kurdish dictionaries to archaeological exploration in Asia, the use of computer-tests in textual criticism, and a study of the pre-Michelangelo decoration of the Sistine Chapel. The ages of the applicants ranged from the twenties to the seventies. Whilst a majority of them were closely connected with the universities or major museums, others were independent scholars. In one way and another, the first year's selection may be regarded as a representative cross-section of the problem as envisaged in the Academy's survey.

The list excludes Three Thousand Pounds set aside for allocation to 'central' learned journals, in continuation of the pilot schemes previously financed by the Nuffield Foundation and All Souls College, Oxford.

£

Dr. F. R. Allchin: By systematic exploration and excavation to link up the little-known cultures in the North-West Frontier region of Pakistan with those towards Afghanistan and Persia on the one hand and towards the Indo-Pakistan sub-continent on the other. The region was one of the main arteries in the movement of cultures and civilizations between central and southern Asia. The work will be undertaken jointly with the University of Peshawar	1,000
Professor J. N. D. Anderson: A two-year project for the preparation of a Union Catalogue of Foreign Law, to be compiled at the Institute of Advanced Legal Studies and to be published by the Institute. Significant material on West European law in the libraries at Oxford, Cambridge and London and in other centres in the U.K. will be listed. (There is now no comprehensive collection of books on West European law; and information as to the location of publications in libraries is incidentally a necessary preliminary to the consideration of purchasing policies.)	750
Anglo-Norman Text Society: Towards the completion of an Anglo-Norman Dictionary, projected fifteen years ago and now under the joint direction of three Chief Editors: Miss L. W. Stone, formerly Head of the French Department of King's College, London, and Reader in Romance Philology in the University of London; Dr. K. Urwin, formerly Senior Lecturer in French, University College of South Wales, Cardiff; and Dr. Alexander Bell. Printing should begin in 1966.	500
The Rev. Dr. J. W. B. Barns: For work in the Palestine Archaeological Museum at Jerusalem on Aramaic papyri recently discovered at Jericho	200
Mr. R. B. Beckett: To prepare for publication the extensive correspondence of John Constable, R.A., with his wife, in continuation of previous volumes of Constable's correspondence published by the applicant	500
Business Archives Council: To assist in the task of ensuring the preservation of Business Records, to carry out research upon them, and in certain cases to make the results readily available for economic historians and other students. Work is carried out under the presidency of the Master of the Rolls	100
Mr. B. A. L. Cranstone: To enable an Assistant Keeper in the Department of Ethnography at the British Museum, accompanied by a Museum Assistant, to employ study-leave in the investigation of surviving, but changing, cultures in the highlands of the Trust Territory of New Guinea. Villages in the area are still in a Stone Age technology which will not endure much longer. Complementary to a grant from the British Museum	300
Professor H. A. Cronne and Mr. R. H. C. Davis: To prepare a concluding volume of the <i>Regesta Regum Anglo-Normannorum, 1135-1154</i> , comprising facsimiles of charters and writs of Stephen's	

	£
reign, with a suitable introduction. The work, including full texts, will be published by the Clarendon Press. It will deal with palaeography and diplomacy	500
Dr. A. B. Cunningham: To prepare for publication a volume of the Wood Papers in the Camden Series of the Royal Historical Society. The private correspondence of Sir Richard Wood, nineteenth-century diplomat in the Near East, was discovered by the applicant, and he has edited it with an introduction.	100
Early English Church Music Committee: A committee of the British Academy, under the Chairmanship of Sir Jack Westrup, F.B.A., is systematically preparing a series of publications of Early English Church Music down to c. 1640. Publication has begun. The work is also supported by the Pilgrim Trust.	1,500
Mr. C. J. Edmonds: Towards the final preparation and publication of a Kurdish-English Dictionary covering the language of belles-lettres, journalism, administration and private correspondence as it has developed on the basis of the dialect of Sulaimani since 1918, when Kurdish was first established as an official language for the Kurdish part of Iraq. No dictionary of the language, or of the Southern Kirmanji dialect out of which it has grown, has yet been published in Europe or America. The dictionary has been accepted for publication by the Clarendon Press	750
Professor L. D. Ettlinger: For assistance in the recording of the pre-Michelangelo decoration in the Sistine Chapel, to be published jointly by the Clarendon Press and the Warburg Institute. The frescoes have not previously been photographed by modern methods	300
Dr. R. M. Haines: To assist in the publication, by the S.P.C.K., with the approval of the Church Historical Society, of a study of diocesan administration in the fourteenth century, with special reference to the Worcester diocese	300
Mr. G. Lankester Harding: To assist in the preparation and the publication of an Index of Ancient South Semitic Names, covering the period from about the eighth century B.C. to the sixth or seventh century A.D. It concerns all the South Semitic dialects—Safaitic, Thamudic, Minaean, Sabaeen, &c.—and involves a reassessment of all texts hitherto published. The work is supported also by the American Philosophical Society and the Canada Foundation	600
Dr. M. Hastings: For the further study of the accounts of St. Stephen's Chapel, Westminster, with a view to publication, beginning with the accounts of Edward I and Edward II	250
Professor C. F. C. Hawkes: For work relating to the British Bronze Age: including the preparation of cards for the British Section of the <i>Inventaria Archaeologica</i> , and for the national <i>Card Catalogue of Bronze Age Implements</i>	325

£

Mr. E. S. Higgs: For a study of the relationship between Europe and Western Asia in Palaeolithic times, with special reference to the late Palaeolithic and Mesolithic industries in Greece and their relation to the well-established successions in Eastern and Western Europe, Russia, and the Levant. These studies are expected to have a bearing on the entry or emergence of <i>Homo sapiens</i> in Europe, and the early domestic animals in the area under investigation	450
Mr. P. Hulin: For the close study of an inscribed statue of King Shalmaneser III of Assyria found at Nimrud in 1956. Extensive parts of the statue are now seen to bear a previously unread inscription of about 368 lines, comprising the longest and fullest account of Shalmaneser's reign so far discovered and of great importance to the historiography of the reign	275
Professor A. H. M. Jones: For assistance in the preparation of the <i>Prosopography of the Later Roman Empire</i> , which has now reached the stage of publication (by the Cambridge University Press)	1,000
Miss D. Kirkbride: To enable the applicant, during her tenure of an Oxford Fellowship in Near Eastern Archaeology, to continue her field-studies of Pre-pottery Neolithic industries in Southern Jordan, with the special aim of bridging gaps between the present known sites. The general problem of the Pre-pottery Neolithic extends from Jordan to Israel, Syria, Anatolia, Northern Iraq, and Pakistan, and appears to have wide cultural implications	1,000
Dr. O. H. M. Lehmann: For the continuing preparation of a <i>Critical Corpus of dated Aramaic and Hebrew Manuscripts</i> from the beginnings to the Middle Ages. The applicant has already completed much of the work in Europe, the Near East, and Russia, but there are still 10,000 MSS. in America awaiting examination. Arrangements have been made for publication	300
Dr. M. C. Lyons: Towards the final preparation and publication of a unique and unpublished Moroccan manuscript translation in Arabic of Themistius's paraphrase of Aristotle's <i>De Anima</i>	300
Dr. C. B. M. McBurney: For the investigation of the Upper Palaeolithic of NE. Persia in connexion with a wider study of the relationship of the Upper Palaeolithic complex of Europe and the Mediterranean basin with that of Western Asia	1,000
Dr. J. P. Mackey: For a study of the Ethical Concept of Sin, with a view to publication. The study relates to the ethics and philosophy of religion and to the related fields of anthropology and the comparative study of religions	350
Professor M. E. L. Mallowan: To provide for the adequate conservation and study of the unprecedented collection of Assyrian ivories discovered in recent years at Nimrud, and now housed largely in Baghdad. Arrangements have been made for publication	1,000

- £
- Dr. D. M. Metcalf: To prepare, in the light of recent advances in the study of Byzantine numismatics, an analytical report on the large quantity of Byzantine coinage found during the excavation of the Agora at Athens. 225
- Monumenta Musicae Byzantinae: Grant to the Committee administered by the Royal Danish Academy in close collaboration with the British Academy and the Union Académique Internationale 350
- Mr. A. Q. Morton: To develop experimentally the use of electronic computers in the textual and stylistic analysis of Greek prose; and to initiate a Central Library of texts on tape ready for use in electronic computers. For the present purpose, the main machine, provided by the Carnegie Trust, is lodged in the Computing Laboratory of Glasgow University. The work will be carried out in collaboration with Professor K. J. Dover (Professor of Greek, University of St. Andrews), Dr. D. C. Gilles (Director of the Computing Laboratory, Glasgow University) and others. 365
- Dr. A. N. Newman: For the preparation of a history of the Stanhope family of Chevening, Kent, with full access to the Chevening archives. The work is already in progress: its material extends from the early eighteenth century to the present day. Previous grants have been received from the Research Board of Leicester University 450
- Dr. C. B. Oldman: To aid a long-term international project for an *International Inventory of Musical Sources*. The U.K. is the only important country in Europe or the Americas for which official or semi-official support for the project has not previously been secured, although the potential contribution from the material housed in London, Oxford, Cambridge, Tenbury, &c. is of high importance. The British contribution will be carried out by a United Kingdom Committee of which the applicant is Chairman 750
- Mr. P. J. Parr: To prepare for publication the important results of archaeological field-work carried out by the applicant in the Nabataean and Roman city of Petra (Jordan) during his tenure of the Assistant Directorship of the British School of Archaeology in Jerusalem. These excavations were the first to be carried out at Petra by modern methods 250
- Professor P. H. Powell: For the preparation of a critical edition in five volumes, with complete apparatus, of the fifteen dramas of the seventeenth-century German poet, Andreas Gryphius. The first volume is due for publication in 1964. An initial grant was received from the Research Board of Leicester University 100

£

Miss J. M. Reynolds: For the preparation of an edition of the Greek and Roman inscriptions of Roman Cyrenaica in collaboration with Mr. R. G. Goodchild, Director of Antiquities in Cyrenaica. The material throws a considerable light on the history of Cyrenaica under Roman rule and on important aspects of Roman life and activities as a whole	250
Miss J. Rimmer: For the preparation of a history of the European harp and its music before the invention of pedals, c. 1720, and a survey of present-day folk and popular survivals of early harps. There is at present no adequate history of the instrument in any language, and the applicant is carrying out full research on Irish and some Welsh and German harps, with field-work in Spain, Italy, and Germany, including the minute examination of relevant instruments and a study of contemporary music from printed and MS. sources. She is also carrying out comparative work on South American harps and their music	250
Dr. E. Rosenbaum: For a survey of Roman funerary monuments in Cilicia (Asia Minor) with special reference to their art and iconography, including the study of wall-painting, mosaics, architecture, and funerary rites	395
Royal Asiatic Society: Assistance for the Society's specialized and important library, and, in particular, for the expert repair of rare bindings and the pages of unique and illuminated MSS.	500
Scottish Dictionaries Joint Council: Since 1952 a council supported by the four Scottish universities, the Carnegie Trust for the Universities of Scotland, and the Scottish National Dictionary Association has been actively preparing two Scottish dictionaries—the <i>Scottish National Dictionary</i> and the <i>Dictionary of the Older Scottish Tongue</i> . Work on the former is expected to be completed by 1972, and on the latter by 1976. The Carnegie Trust continues its support conditionally upon a measure of progress which necessitates considerably larger funds than are available from this source alone	1,000
Dr. D. J. Smith: To complete the preparation of a <i>Corpus of Roman Mosaics in Britain</i> , now in its final stages	400
Mr. R. H. N. Smithers: For assisting in an arranged campaign of archaeological exploration in Southern Rhodesia with special reference to the examination of ancient workings at pre-colonial gold mines	500
Dr. P. Stirling: Towards the cost of a field-study of social changes among the assignees of land under the Italian Land Reform. Work will be carried out with the aid of a qualified research assistant	150
Professor T. Sulimirski: Towards the cost of research-work in the Neolithic and Bronze Ages of Eastern Europe with special reference to Hungary, Rumania, and Poland	250

	£
Professor E. G. Turner: Towards the cost of methodical work upon the large quantity of fragmentary Oxyrhynchus papyri which still await attention in cases at Oxford. In addition to aid received from the Egypt Exploration Society, the Universities of Oxford and London, and the Gulbenkian Foundation, there is at present need for a research assistant to carry out technical and other work on the papyri under Professor Turner's direction	300
Mrs. A. D. Ure: To complete a study of the floral style in black-figure vase-painting in central Greece in the fifth and fourth centuries B.C., and in particular to work on Greek collections not previously available	150
Mr. M. J. Webb: To complete the mapping of ancient field-systems in the neighbourhood of Cyrene (Libya) as revealed by air-photography and ground-survey. The remarkable field-system associated with the ancient city is thus being recorded analytically for the first time	450
	£20,735

(ii) PILGRIM RESEARCH FUND.—*To aid research by provision for travelling-expenses, the making or purchase of photographs or microfilms, maintenance during research-work, or secretarial help. For these purposes the Pilgrim Trust made an annual allocation of £2,000 to the Academy for the years 1955-60, and renewed the allocation for 1962-4. The grants made from this fund during the current year are as follows:*

	£
Mr. H. S. Bennett, F.B.A.: For travelling and typing expenses in connexion with the preparation of the second volume of his <i>Books and Readers</i> , dealing with the provision of reading matter during the reign of Elizabeth I. The work should near completion by the end of the year	100
Dr. G. Caton-Thompson, F.B.A.: For cataloguing negatives of field-work carried out by her in the Fayum Northern Desert. Following the probable irrigation of the area, it is likely that much existing evidence will be submerged. The records will be presented to some suitable institution when the cataloguing is completed.	50
Mr. Brian Fagan (Keeper of Prehistory, Rhodes-Livingstone Museum): For an archaeological investigation of the Stone and Iron Age sequences of the Lochinvar Ranch in Northern Rhodesia, concentrating on the borders of the Kafue Flats flood plain. The excavation is expected to yield information on seasonal migration, population-densities, and physical anthropology. The work is mainly sponsored by the Rhodes-Livingstone Museum.	214

Miss Sheila Gibson, A.R.I.B.A.: For a visit to Italy in order to study and survey the Church of San Liberato on the site of the <i>Forum Clodii</i> , one of the few Roman towns in the area which survived into the Middle Ages. The Church was built on Roman foundations in the 8th-9th century, substantially rebuilt in the 12th century and converted into a residence with chapel in the 16th century	75
Miss Clare Goff (Wolfson Fellow at the British Institute of Persian Studies): For the completion of her survey of Chalcolithic painted pottery in south-western Iran	300
Mr. R. A. Higgins, F.S.A. (Assistant Keeper, Department of Greek and Roman Antiquities, British Museum): For the expenses of a journey to Crete and photographic costs in connexion with his study of an important votive deposit of terracottas at Knossos. The deposit is likely to throw new light on the typology and dating of material of the classical period	150
Mrs. R. J. Leys: To supplement her Suzette Taylor Fellowship at Lady Margaret Hall in connexion with research on medieval Italian records, and for work on a comprehensive topographical, biographical, and general index to the <i>Commentarii</i> of Aeneas Sylvius Piccolomini (Pope Pius II)	200
Dr. R. G. Lienhardt (Lecturer in African Sociology, Oxford University): Towards a visit to the Sudan in order to study the Shilluk, who remain the one northern Nilotic people who have not been professionally studied. Changes taking place are fast removing comparative material	250
Miss Elena Lourie: For travelling and photographic expenses in connexion with research on Christian attitudes to Islam in Spain, with special reference to the reign of Alfonso III of Aragon and the conquest of Menorca	150
Mr. B. F. McGuinness (Tutor, Praelector in Philosophy, The Queen's College, Oxford): Towards the cost of transcribing MSS. notebooks from the papers of the late Dr. Friedrich Waismann, F.B.A., relating to the work of Ludwig Wittgenstein. The notebooks are the authentic record of Wittgenstein's relations with the Vienna Circle, and are of interest for the study of Wittgenstein's own thought and of its development	100
Mr. G. M. Matthews (Lecturer in English Literature, Leeds University): Towards the cost of microfilms, photostats, and travelling in Italy and the U.K., while working on an annotated edition of Shelley's poetical works	300
Mr. J. B. Ward-Perkins, F.B.A.: Towards the expenses of visiting and photographing monuments of the Augustan and Julio-Claudian period in South France and Spain in connexion with a new study of Roman architecture	80

	£
Mr. C. Weightman (Wolfson Fellow at the British Institute of Persian Studies): For the purchase of a camera and equipment for microfilming Ahl-e-Haqq sacred books in Kurdistan and Tehran	100
Mr. John Wymer (Museum and Art Gallery, Reading): For continuing research in Denmark on the Mesolithic period, following the study of a Mesolithic site at Thatcham, Berkshire	54
	£2,123

(iii) ALBERT RECKITT ARCHAEOLOGICAL FUND.—*To provide for the exploration and excavation of ancient sites in any part of the world with a view to increasing knowledge of early civilizations and the history of mankind; and for the preservation and exhibition of evidence and the publication of results.*

British Institute of History and Archaeology in East Africa: Renewal of grant towards the completion of the excavations on Kilwa Kisiwani, Tanganyika, prior to comprehensive publication	250
British School of Archaeology in Jerusalem: Towards the cost of excavations in Jerusalem, particularly in relation to the Jebusite defences, and to those of the Herodian city, with special reference to the site of the Crucifixion	250
Dr. P. Dikaios (Curator, Department of Antiquities, Nicosia): Towards the cost of publishing the final report on excavations at the Bronze Age town of Enkomi, Cyprus (1947-58)	300
Professor C. F. C. Hawkes, F.B.A.: For the continuation of work dealing with the cemetery of Sarre and cemeteries in East Kent as a contribution to the <i>Corpus of Anglo-Saxon Graves and Grave Goods</i>	325
Professor C. F. C. Hawkes, F.B.A.: For research into the immigrant founders of the Southern British Iron Age. Comparative material of the French First Iron Age will be sought in French museums from Toulouse northwards	175
Dr. B. S. J. Isserlin (Department of Semitic Languages and Literature, Leeds University): For further excavation at the Phoenician town of Motya (Sicily), prior to comprehensive publication	25
The Rev. V. E. G. Kenna: For the costs of drawing and photography for the international <i>Corpus of Cretan and Mycenaean Seals</i> , sponsored by the Akademie der Wissenschaften und der Literatur, Mainz	250
Mr. J. Mellaart: Token grant towards the excavation of the Neolithic site at Catal Hüyük, on the Konya Plain of Turkey. Buildings of the 7th millennium have produced remarkable wall-paintings and sculptures; but levels to a further depth of 32 ft. remain to be excavated	400

£

Mr. C. A. R. Radford, F.B.A.: Towards the investigation of late pre-Conquest fortifications at Cricklade, Sulgrave, and Tamworth, with reference to forts listed in the early 10th-century Burghal Hidage. The work is mainly sponsored by the Queen's University, Belfast

375

£2,350

(iv) HENRIETTE HERTZ FUND.—*To promote the publication of philosophical work or to reward meritorious publication in the department of philosophy.*

International Philosophical Bibliography £15

(v) LEOPOLD SCHWEICH FUND.—*To provide for the furtherance of research in the archaeology, art, history, languages, and literature of Ancient Civilization with reference to Biblical study.*

British School of Archaeology in Jerusalem: Towards the cost of excavations in Jerusalem, particularly in relation to the Jebusite defences and to those of the Herodian city, with special reference to the site of the Crucifixion

£750

(vi) STEIN-ARNOLD FUND.—*For the encouragement of exploratory research on the antiquities or historical geography or early history or arts of those parts of Asia which come within the sphere of the ancient civilizations of India, China, and Iran, including Central Asia, to be carried out, as far as possible, by British or Hungarian subjects; special consideration to be given to the territories comprised in the present Kingdom of Afghanistan, including the region of ancient Bactria, and to the north-western frontier region of the Indo-Pakistan subcontinent.*

British Institute of Persian Studies: Towards the cost of the excavation of the Achaemenid capital at Pasargadae, Iran

£1,000

(vii) WILLIAM HEPBURN BUCKLER FUND.—*To assist or make possible research into the history and antiquities of Asia Minor and Cyprus in the Classical Greek, Roman, and Byzantine periods, by travel and publication.*

No award for 1963-4.

10. CENTRAL PERIODICALS FUND.—The fund placed at the disposal of the Academy by All Souls College, Oxford, to enable the Council to continue its subvention to 'central' periodicals was allotted as follows:

	£
Antiquity	200
British Numismatic Journal	100
Bulletin of the Institute of Historical Research	100
Classical Journals Board (Classical Quarterly and Classical Review)	200
French Studies	150
German Life and Letters	150
Historical Journal	120
Italian Studies	150
Journal of Hellenic Studies	300
Journal of Roman Studies	300
Journal of the Royal Anthropological Institute	200
Journal of the Royal Asiatic Society	300
The Library	150
Medium Ævum	200
Modern Language Review	300
Numismatic Chronicle	100
Palestine Exploration Quarterly	150
Past and Present	150
Philosophical Quarterly	150
Philosophy	75
	£3,545

11. ARCHAEOLOGICAL AND HISTORICAL ADVISORY COMMITTEE FOR OVERSEAS CO-OPERATION

1. *Aden*.—(i) The Committee had for some time represented the need for a full-time Director of Antiquities at Aden, and was glad to receive the report that in October 1962 Mr. D. B. Doe was appointed as the first full-time Director in the Colony. (ii) Mr. G. Lankester Harding had presented his illustrated Report on the survey of archaeological sites and monuments carried out by him during two seasons in the Colony and Protectorates. The Report was now being printed by the Stationery Office for the Colonial Office, and publication was expected before the end of 1963. (iii) The construction of a new Museum, projected by Mr. D. B. Doe with the approval of the Aden Government, was expected to begin shortly. As a non-Government enterprise it should be immune from disturbance in a changing political situation. The Governor had agreed to be the Museum's patron.

2. *Basutoland, Swaziland, and Bechuanaland*.—The Reverend Gervase Mathew had reported to the Committee that no systematic arrangements were at present in force to protect and conserve the monuments and sites of these territories, in the absence of any serious attempt to implement the Antiquities Laws at present in force. Mr. Mathew accordingly recommended (i) that there should be a schedule of protected sites; (ii) that the High Commission should revise its Antiquities

Laws on the model of that now in force in Tanganyika; (iii) that there should be an Antiquities Service to implement legislation, consisting of an Archaeological Adviser with a clerk for each territory; and (iv) that steps should be taken to set up a joint museum for the three territories. Representations were being made by the Committee to the Colonial Office through the Department of Technical Co-operation.

3. *Archives in East Africa*.—Preliminary consideration has been given to the question of the preservation of documents in East African territories now passing from the control of the Colonial Office. Miss Margery Perham, C.B.E., F.B.A., of Nuffield College, Oxford, and Mr. T. H. R. Cashmore, lately an administrative officer in Kenya, have been active in the matter, and under Miss Perham's direction a conference has been held at Nuffield College to consider the whole problem of colonial records. Some progress is reported, but much remains to be done.

12. **ARCHAEOLOGICAL SALVAGE-WORK IN NUBIA**.—In continuance of its special aid to the Academy for the purpose of recovering such archaeological and historical evidence as may be possible from that part of Nubia which is shortly to be flooded as the result of the new dam at Aswan, H.M. Government in 1962-3 allotted to the Academy a supplementary grant of Five Thousand Pounds, and in 1963-4 a further grant of Ten Thousand Pounds, to facilitate excavation and survey. The Academy is passing these sums on to the Egypt Exploration Fund, and the work is being carried out under the direction of Professor W. B. Emery, F.B.A. Professor Emery reports as follows:

The activities of the Egypt Exploration Society's expedition to Buhen this year were centred on the task of dismantling the temple of Hatshepsut in co-operation with the Sudan Antiquities Service, who have transferred it to Khartoum, where it will be re-erected in the grounds of the new museum. However, during inevitable intervals in the work on the temple, advantage was taken to excavate both in the fortress and in adjacent areas.

Work was started on November 13, 1962, and concentrated, until the end of the month, on the construction of two great earth ramps; one on the south side of the temple leading down to the river, and the other connecting the temple with the big sand dump which had accumulated from the 1959-60 excavations in the north-west corner of the fortress. The purpose of the first ramp was to facilitate the transport of the dismantled stones of the temple down to the river, where they would be loaded on to a barge for transfer to the railhead at Wadi Halfa. The second ramp was built for the light railway which would bring the sand from the dump into the temple, where it was to form a cushion floor of varying depths as the stone blocks of each layer of the building were removed. To obtain sand, rubble and stone for these ramps, it was decided to excavate the denuded area inside the fortress, which we had hitherto considered unworthy of clearance. This led to unexpected results, for although the upper structures of the buildings had disappeared, we found, by digging below the ancient ground level, that traces of much of their foundations were still preserved. From these remains, the general plan of

this part of the Middle Kingdom town was ascertainable, so that, even when sufficient earth and rubble had been removed for the ramps, we continued these excavations with varying success in January 16, 1963. By this time an area of more than 3000 square metres had been examined in detail. A considerable number of inscribed stone fragments were recovered, most of them of New Kingdom date and belonging to door structures of buildings which, built above the Middle Kingdom remains, had long since disappeared. Although most of these inscribed fragments were badly broken up and of little value, there were some of historical interest, such as a door lintel bearing the Horus name and the prenomen of Senusret I. Another lintel part was found in the temple area, showing the kneeling figures of Hori, Viceroy of Kush, and Hor-mes, Governor of Buhen before the cartouches of Rameses III. But certainly the most outstanding object found in this seemingly barren area was the face of a small male statue of red quartzite. This almost undamaged fragment of Middle Kingdom sculpture is a work of considerable merit.

While the main body of the workmen was engaged on these excavations, another group was employed on the removal of part of the temple enclosure walls and the modern roofing built more than sixty years ago to protect the sanctuary.

After some delay because of the non-arrival of chemicals from Europe, work on the preservation and strengthening of the temple stonework necessary prior to the dismantling of the structure, was begun on January 1, 1963, and the following procedure was adopted:

- (1) Encrustations of hornets' nests, bird lime, modern cement and other deposits on the wall surfaces were carefully removed with sharp knives, and the joints between the blocks were cleaned out as far as possible.
- (2) All carved and painted surfaces were covered with a 5% solution of white flake shellac in alcohol. This solution was just brushed on.
- (3) Cotton voile was then applied to all weak, plastered and painted wall surfaces. The adhesive used was 'Cellofas B', which was applied by brush in a fairly thick solution. The shellac was allowed twenty-four hours to harden before the application of the cloth.
- (4) When the cloth was dry, the joints between each block were cut with a sharp knife and the edges were stuck down with a further light application of shellac.

The chemical treatment of the walls was completed by January 7, 1963, and the blocks ascribed to Taharka, which had been inset (for their protection) by our predecessors in the reconstructed south enclosure wall, were removed and packed. In connexion with these remains, which, if not belonging to Taharka, certainly are to be dated to the Ethiopian period, some very interesting discoveries were made. For more than sixty years the sanctuary of the temple had been protected by a wooden roof which was supported on square pillars built partly of brick and blocks of stone which the builders had found lying on the floor of the partly excavated structure. These pillars had been faced with white painted stucco, so that the fact that some of the stone blocks were inscribed was not apparent until we dismantled them in removing the wooden roof. Most of the inscribed blocks certainly are identical both in

style and execution to the so-called Taharka material, and it became obvious that they belonged to some additional structure of the original temple. Their original location and function were later revealed when the pavement in front of the sanctuary was cleaned preparatory to the removal of the colonnade in front of it. There can be little doubt that they formed part of a screen wall built between the columns; for they fit in the grooves cut in these columns and in trench-cuts in the paving.

Other fragments of inscribed stone from the dismantled piers of the modern roof were also of considerable interest. There was part of a large historical stele of Akhenaton, pieces of which were found by Woolley and MacIver in 1910 in the forecourt of the North Temple, which was probably its original location. It records the crushing of a revolt by the Viceroy of Kush, which had broken out in the land of Ikayta.

After the preliminary work of chemical protection and the dismantling of the modern protective structures, a breach was made in the west wall, and through it sand was brought to raise the floor level of the temple to the bottom of the top course of stone. This task was finished in a few days, and on January 20 the dismantling of the temple was begun in earnest, to be carried on, without serious interruptions, until April 10, when the work was brought to a successful conclusion, with the stone blocks packed and delivered safely to the new museum at Khartoum.

On the excavations, the clearance of the town area being completed, our attention was turned to a feature of the fortress defences which had long been puzzling. At the bottom of the brick wall which blocks the end of the north ditch is the mouth of a stone-built conduit opening out at a level 70 cm. above the floor level. It is as yet impossible to say if it was to drain water from the ditch or to let water into it, and with a view to a solution of this question we commenced a series of pits in an attempt to find its outlet. This has proved a much bigger undertaking than had been anticipated, and, although the conduit has been traced in a northerly direction parallel to the river for a distance of more than 130 metres, no sign of its source has yet been discovered, nor any indication of its turning towards the river. Further investigation of this puzzling feature will be made next season.

During an interval of a few days early in December 1962 the large cemetery situated south-east of Gebel Turob was explored. This proved to be late X-Group bordering on the Christian period. But it was so completely plundered that only 35 graves were excavated; they were of two types, the lateral niche and the barrel vault. All had originally been covered with circular earthen tumuli, but all had been reduced to ground level by plundering and wind erosion.

13. JERUSALEM EXCAVATIONS.—The British School of Archaeology in Jerusalem, under the direction of Dr. Kathleen Kenyon, carried out in 1962 a second season of excavations in Jerusalem, in collaboration with the Academy and the *École Biblique de St. Étienne* and the Royal Ontario Museum. The principal immediate objective remains the identification of the boundaries of the city at successive periods. The 1961 season had shown that the fortified area was wholly

or mainly confined to the eastern ridge of the area south of the present Old City until a comparatively late date, but on the other hand it had become clear that the town extended down the slope far outside the line of walls on the crest hitherto identified as those of the Davidic city. The 1962 excavations identified a defensive wall low on the slope which was in use from the 18th to the 8th centuries B.C., thus belonging to both Jebusite and Israelite Jerusalem. It was further established that the wall on the crest was built by Nehemiah and strengthened by the Maccabees. Other excavations aim at identifying the position of the walls on the western and northern sides.

Within the Old City, work (still in progress) was continued on a site that may throw light on the line of the north wall at the time of the Crucifixion. On two other sites work was begun that should provide important evidence for the Muslim, Roman, and Herodian periods.

14. SYLLOGE OF COINS OF THE BRITISH ISLES.—The Committee's third volume, *Coins of the Coritani* by D. F. Allen, was published in February 1963, the first to be devoted solely to the Ancient British series. It is an attempt to isolate and analyse the minting of one tribe, on the basis of coins in the British Museum. Publication of the first volume of the Copenhagen collection, edited by Dr. Galster, may be expected by the end of 1963. This will be followed by *Chester I*, devoted to coins from the Chester mint. The second of the four Copenhagen volumes is in the Committee's hands and *Edinburgh I* is expected during the summer. Meanwhile work at the Ashmolean goes forward, and both *Chester II* and *Belfast I* are progressing well. It is expected that within the next year the first volume of the parallel British Museum series, the Hiberno-Norse volume by R. H. M. Dolley, will appear, and the Charles I volume is in active preparation.

15. MEDIEVAL LATIN DICTIONARY.—The first proofs of the *Revised Word-List* have been received from the printers and work has begun on the second proofs. The Editor's Introduction and a Select Bibliography have been sent to press and the work should be ready for publication before the end of 1963. No new texts have been read for the Dictionary during the year, although casual additions have been received, mainly from the Public Records, and the revision of the proof has involved the further checking of many slips with consequent emendation. Enquiries about specific works are dealt with from time to time and further fascicules of the *Novum Glossarium*, down to the end of M, have been submitted for verification of the material from British sources.

16. EARLY ENGLISH CHURCH MUSIC.—The project for the publication of Early English Church Music was launched in 1962 by a Committee of the British Academy with the support of the Pilgrim Trust, and has now moved into a full programme of publication. The

first issue, a volume of *Early Tudor Masses* edited by the Executive Editor, Dr. J. D. Bergsagel, was published in January 1963; the second volume, *Latin Antiphons and Psalms of William Mundy*, edited by the General Editor, Dr. F. Ll. Harrison, is expected immediately; and two further volumes, *Verse Anthems of Orlando Gibbons* and *Early Tudor Magnificats*, are with the engraver. In addition, three volumes are complete in manuscript, and await their turn at the engraver's. Some twenty volumes have been arranged for, and these will fill the programme of publication for at least five years.

The Committee is also sponsoring a catalogue of English Service Music from the Reformation to the Restoration, to serve as a complete work of reference in this field. Negotiations with a recording company interested in issuing a series of long-playing records parallel to the volumes of music are in progress. The list of subscribers to the series numbers more than three hundred and continues to grow on a widely representative basis. This series, with *Musica Britannica*, is an example of the initially subsidized publications of important national music of which there are many on the continent; but, unlike most such publications, it is designed to serve both scholarly needs and the interest of a wider public.

17. REPERTORY OF THE SOURCES OF MEDIEVAL HISTORY.—Volume I, *Series Collectionum*, was issued during 1962, and the compilation of volume II, which will be in several parts, is proceeding. Mr. Philip Grierson, F.B.A., attended the annual meeting of the central committee in Rome in November 1962.

18. ENCYCLOPAEDIA OF ISLAM.—During the past year work has continued on the publication of Volume II; fascicules 26-31 have appeared, and fascicules 32 and 33 are in the press. Fascicule 34 should also be published before the end of 1963.

19. ENGLISH PLACE-NAME SOCIETY.—The West Riding survey has been completed by the issue of Part VIII and the Index of all the Yorkshire volumes. Three volumes of Gloucestershire are in the press and two of them are in page proof, whilst the fourth volume is ready to go to the printer. Considerable progress has been made with the Westmorland survey and the publication of that county or Cheshire will follow Gloucestershire.

20. MONUMENTA MUSICAE BYZANTINAE.—During the year fascicule 5 of the *Prophetologium*, edited by G. Zuntz, has been published. It is expected that the facsimile volume of *Cod. Saba 83* will be finished before the end of 1963; this is one of the most ambitious ventures in musical palaeography and will contain the script of the 13th century, and also, with the aid of infra-red, the original 11th-century script partly redrafted in the 13th century. The cost of a copy of this volume

is likely to be in the region of £70, but the Danish Academy is subsidizing it so that the price may be reduced to about £40 a copy. Professor O. Strunk is preparing a volume on *Specimina notationis antiquioris*, and Dr. E. J. Wellesz has contributed a chapter on Byzantine musical notation for a volume edited by Leo Schrade which is now with the printer.

21. **THESAURUS LINGUAE LATINAE.**—The fund collected through the Academy for this work has now reached a total of £2,615.

22. **ARISTOTELES LATINUS.**—Volume III. 1–4, *Analytica Priora*, edited by L. Minio-Paluello, was published in November 1962. It contains the two recensions of Boethius's translation, the anonymous medieval version, a large body of 5th–6th century scholia translated from the Greek, specimina of about twenty post-medieval translations, testimonia on *Pr. An.* from Boethius to the twelfth century, full Graeco-Latin and Latin-Greek indices. Volume II. 1–2, *De Interpretatione* (ed. L. Minio-Paluello and G. Verbeke) is ready for the press; it will contain Boethius's and William of Moerbeke's translations, specimina of post-medieval versions, and indices. Considerable progress has been made on volumes XVII. 3. i (*De Historia Animalium*, trans. Guill. de Moerbeke, ed. R. A. B. Mynors); XVII. 3. v (*De Generatione Animalium*, trans. Guill. de Moerbeke, ed. H. J. Drossaert Lulofs); XXIII (*De Lineis Insecabilibus*, trans. Grossat (ed. R. A. B. Mynors); XXV. 2 (*Metaphysica*, trans. Anon., Media, ed. G. Diem); XXVI. 1–2 (*Ethica Nicomaches*, trans. Anon., Eth. Nova, Vetus, Borghes, trans. Grossat, and revised version, ed. R.-A. Gauthier). Work has also been begun on I. 6–7 (*Supplementa Categoriarum*, Porphyry's *Isagoge*, trans. Boethius, and *Liber Sex Principiorum*, L. Minio-Paluello) and XI. 1–2 (2nd edition) (*De Mundo*, trans. Barthol. and Nicolai, ed. by W. L. Lorimer, with appendix containing two 15th-century translations and specimina of later ones ed. by Mrs. G. Freed Muscarella and L. Minio-Paluello). Miss Helen Powell of Oxford, helped by grants from the Union Académique Internationale and the Jowett Fund Trustees, has co-operated in various ways, particularly in the later stages of the preparation of Vol. II. 1–2 and the survey of incunabula editions of Latin texts of Aristotle for the *Supplementa Tertia*. It is now planned to organize an archive of photographs, photostats, and microfilms of Latin Aristotelian manuscripts in order to have a central collection for reference and in order to help collaborators, particularly in the early stages of their work. The financial burden of publication of Volume III. 1–4 was borne mainly by the Jowett Fund, with contributions by the U.A.I. and the British Academy.

23. **CORPUS PLATONICUM.**—Volume IV of the *Plato Latinus*, containing Plato's *Timaeus* with the Commentary by Calcidius, edited by J. H. Waszink, has appeared. It is expected that the next volumes to be published will be the *Handlist* of Latin Plato manuscripts and the

first Latin translation of Plato's *Parmenides*, which has been recently discovered and was revised in the 15th century by the Platonic philosophers, Nicholas of Cusa and Bessarion.

24. PROSOPOGRAPHY OF THE LATER ROMAN EMPIRE.—The Committee for the Prosopography of the Later Roman Empire was formed in October 1949, to revive a project which was first initiated by the Berlin Academy in the 1880's but foundered in the 1914-18 war. The surviving material was made available to the new body, but proved useful only for purposes of control. It was therefore necessary to begin afresh, reading and excerpting all sources. Many scholars in many lands have dealt in this fashion with particular authors and collections, and the Committee has been able to share some of the work with the *Prosopographie chrétienne*, in preparation at the Sorbonne. Nevertheless, the volume of sources to be studied is so large that the problems of publication could not be considered until 1961. It has now been possible to reach this position through the services, as full-time assistant secretary, first of Dr. J. Mann, now of Durham University, and subsequently of Mr. J. R. Martindale, whose experience and continuity have been indispensable.

By 1962, enough evidence had been collected to enable the Committee to start upon the first volume, A.D. 260-395. After some months spent in the sorting of thousands of cards and in filling the main gaps in the evidence, the drafting of individual entries began at the end of the year, and a suitable form of presentation has now been established. So far, between one and two hundred entries, of an estimated total of four or five thousand, have been completed. It is anticipated that the fourth-century volume should be ready for publication in three or four years, on the assumption that it may be possible to retain the full-time services of Mr. Martindale and the part-time help of Dr. John Morris.

25. UNION ACADÉMIQUE INTERNATIONALE.—The 36th Annual Meeting was held in Brussels, 18-22 June 1962. The Academy's representatives were Sir Roger Mynors and Mr. C. H. Roberts. The following matters in which the Academy has a direct interest are summarized from the *Report* of the Conference.

1. CORPUS VASORUM ANTIQUORUM.—During the previous year the following fascicules had appeared: *Germany*: Munich 5, by R. Lullies. *France*: Musée de Laon 1 (geometric, black-figure, and red-figure vases), by Mme J. de la Genière. *Italy*: Museo del teatro romano di Verona (Corinthian, Italo-Corinthian, Italian geometric vases; black-figure Etrusco-Ionian vases; black-figure and red-figure Attic vases; black Attic vases; pottery of southern Italy and Sicily; Campanian vases), by Mlle G. Riccioni.

The following fascicules were in the press or in preparation: *Germany*: Berlin 2 and 3, by A. Greifenhagen; Stuttgart, by E. Kunze-Götte;

Heidelberg 2, by Margot Schmidt. *Austria*: Vienna: Kunsthistorisches Museum 3 (Attic red-figure kraters), by F. Eichler. *United States*: Metropolitan Museum 3 (black-figure amphorae), by D. von Bothmer. *Denmark*: Copenhagen: National Museum 8 (6th-4th century Attic vases). *France*: Louvre 13 (Corinthian vases), by F. Villard; 14 (index to fascicules 8-13), by F. Villard; 15 (red-figure lekythoi and white-background lekythoi), by Mme L. G. Kahil. *Spain*: Barcelona 3 (Greek pottery not found at Empurias), by Mme Trias de Arriba. *Hungary*: Budapest: Fine Arts Museum 1 (Italian vases from the geometric period to Gnathian style), by J. Gy. Szilagyí. *Italy*: Taranto: Museo Nazionale 3, by C. Drago; Rome: Capitoline Museums 1, by G. Q. Giglioli and V. Bianco. *Norway*: a fascicule of Bronze Age Greek vases and fragments. *Poland*: Warsaw: National Museum 5 and 6 (Mycenaean, Cypriot, 'Rhodian' and Corinthian styles), by Mlle M. L. Bernhardt. *Rumania*: Bucharest 1 (Mycenaean, Cypriot Corinthian and Attic pottery from geometric to red-figure, Italiote and Hellenistic styles), by Mme Suzana Dimitriu and Petre Alexandrescu; 2 (geometric, Corinthian and Attic styles), by Mme Suzana Dimitriu and Petre Alexandrescu. *Sweden*: Stockholm: Medelhavsmuseet 1. *Switzerland*: Geneva: Musée d'Art et d'Histoire 1, by Mlle Bruckner; 2, by C. Dunant and Mme L. G. Kahil.

2. CORPUS OF GREEK AND LATIN INSCRIPTIONS.—*Great Britain*: The revised edition of the Greek and Latin inscriptions of Great Britain, with English commentary, had recently been published (Oxford). *Spain*: Work was in progress on a corpus of inscriptions of the Iberian Peninsula. *Hungary*: Work on Szekszard, Pécs and Magyútény had been completed, and that for Komárom and Gyór-Sopron was in progress. *Italy*: Three fascicules supplementary to CIL and CIG were in preparation, Tarentum, Aquileia, and Verona. The twelfth volume of the Italian series (*Fasti Anni Juliani*) was in the press; and a new edition of the Greek inscriptions at Rome was in preparation. *Yugoslavia*: The Yugoslav Academy had set up a committee for work on the Greek and Latin inscriptions from Yugoslavia; at the same time, work was continuing on the Yugoslav inscriptions for the CIL of the Berlin Academy. *Rumania*: Work was almost finished on the corpus of inscriptions from Rumania, and was continuing on the revision of the volume on Dacia, in collaboration with the Berlin CIL.

3. TABULA IMPERII ROMANI.—*Great Britain*: Good progress was being made on the Ancyra-Iconium sheet under the direction of J. B. Ward-Perkins. Almost all the territory had been covered apart from the North-East. *Austria*: Work was in progress on the Mediolanum and Prague sheets. *Hungary*: About 4,000 literary references were being edited, and a topographical survey was in progress. *Italy*: The collection of material for the Milan sheet was continuing; Switzerland,

Germany, Venetia, Emilia-Romagna, and France were already completed; Lombardy, Piedmont, and Liguria were in preparation, though more slowly. *Yugoslavia*: The Slovene Academy at Ljubljana proposed to prepare a historical map of the part of the Roman Empire corresponding with Modern Yugoslavia, on the model of the map of Roman Britain. Another committee had been formed by the Yugoslav Academy at Zagreb to work on the Roman *Limes*. *Netherlands*: It was reported that the Amsterdam sheet, in so far as it concerned the Netherlands, was complete. *Rumania*: The first fascicule, that for Lower Dacia, would shortly be printed by the Rumanian Academy. The second fascicule dealing with Scythia Minor was also well advanced. *Switzerland*: The Swiss section of the Milan sheet was in preparation, in consultation with Professor G. Lugli.

4. ARISTOTELES LATINUS.—See section 22 above, p. 24.

5. CORPUS PLATONICUM.—See section 23 above, p. 24.

6. CODICES LATINI ANTIQUIORES.—The expected Volume X, containing manuscripts in the libraries of Austria, Belgium, Czechoslovakia, Denmark, Egypt, and Holland, had been delayed. Volume XI, dealing with Hungary, Poland, Spain, Sweden, the U.S.A., the U.S.S.R., and Yugoslavia, was in preparation and would contain addenda to the ten preceding volumes.

7. CORPUS VITREARUM MEDII AEVI.—Two volumes had been published in 1962, namely *Austria*: Vol. I, by Dr. Eva Frodl, dealing with the medieval glass in Vienna; and *Belgium*: Vol. I, by Jean Helbig, recording the 13th-16th century glass of the country.

The following volumes were in preparation.—*Austria*: Vol. II on the medieval glass of Lower Austria. *Czechoslovakia*: The first volume was approaching completion. *France*: Volumes for Saint-Ouen, Rouen (XXV, 2), Strasbourg Cathedral (VIII), Limousin and Poitou (XVII), Paris (II), Seine Maritime (XXV, 3), Languedoc and Guyenne (XV and XVI), Chartres (XX). *Germany*: Vol. IV for the Rhineland; Vol. II, Swabia; Vol. V, Cologne Cathedral; Vol. VII, Erfurt and Mülhausen; Vol. IX, Nuremberg (1300-1500); Vol. XI, Franken; and Vol. XII, Regensburg-Oberpfalz. *Great Britain*: The first volume, dealing with Berkshire, Buckinghamshire, and Oxfordshire, was under the direction of Professor Francis Wormald and work was actively proceeding. *Italy*: Tuscany (II) and Milan (IV). *Poland*: Scaffolding had been erected at the churches of Our Lady and Corpus Christi in Cracow in preparation for research for Vol. I. *Scandinavia*: Vol. I, dealing with Sweden, Denmark, Finland, and Norway, was under preparation. *Spain*: Vol. I containing the medieval glass of Catalonia and Aragon. *Switzerland*: Vol. III, comprising Swiss 14th-16th century glass, was reported to be in the press.
