

**The British Academy is
the UK's national academy
for the humanities and
social sciences.**

We mobilise these disciplines to understand
the world and shape a brighter future.

From artificial intelligence to climate change,
from building prosperity to improving wellbeing
– today's complex challenges can only be resolved
by deepening our insight into people, cultures
and societies.

We invest in researchers and projects across
the UK and overseas, engage the public with
fresh thinking and debates, and bring together
scholars, government, business and civil society
to influence policy for the benefit of everyone.
